

NEW PERFLUORINATED PRODUCTS

In addition to our extensive range of certified reference standards for linear perfluoroalkyl carboxylic acids and perfluoroalkane sulfonates, **Wellington** also offers individual reference standards of some branched isomers. It is well documented that branched and linear perfluorinated compounds can have varying isomer profiles in biological samples. Therefore, to aid researchers in the analysis of these compounds, **Wellington** is adding two additional branched perfluoroalkyl reference standards (**P355TMHxA** and **NaP6MHpS**) to our line of perfluorinated compounds.
