

JOB POSITION FOR AN
RESEARCH & DEVELOPMENT CHEMIST

Wellington Laboratories Inc. is an internationally known supplier of environmental reference standards for use in environmental analysis and toxicological research (<http://www.well-labs.com>). The company is comprised of a Reference Standards Division, a Research Division, and an Analytical Division operating in a modern technical facility in Guelph, Ontario. The company's foundation is based on its staff which possesses a strong combination of synthetic/organic and environmental/analytical backgrounds.

We currently have an opening for a Research & Development Chemist in the Research Division.

Position Summary:

The candidate will have the responsibility to:

- Perform sample preparation method development as well as validation of optimized procedures for internal analyses and environmental research projects.
- Keep up with scientific literature related to new and applicable sample preparation techniques.
- Maintain an organized and detailed laboratory notebook.
- Participate in stability studies as well as internal and external proficiency testing schemes as required.
- Prepare, package, and complete required paperwork for the generation of environmental reference materials.
- Participate in the organization and execution of interlaboratory studies for the development of environmental reference materials.
- Maintain an inventory of necessary lab supplies.
- Acquire, analyze, and report data using analytical instrumentation (LC/MS/MS and GC/MS/MS) when trained.
- Practice laboratory safety.
- Comply with the requirements of Wellington's ISO registrations/accreditations (ISO 9001:2015, ISO/IEC 17025:2017, and ISO 17034:2016).

Requirements:

- MSc (preferred) or BSc with experience in an analytical laboratory and/or environmental chemistry.
- Knowledgeable in sample extraction and cleanup techniques.
- Level 1 Police Check for participation in our Air Cargo Security Program.
- Excellent oral and written communication skills.
- Advanced computer literacy.
- Able to maintain high work standards and pay close attention to detail.
- Ability to work independently and as part of a multi-disciplinary team.

- Self-motivated and able to manage a variety of projects at one time.
- Knowledge of analytical instrumentation (e.g. gas/liquid chromatography, mass spectrometry, etc.) and ability to interpret data.

Salary – to be negotiated

Position Status – Full time, employee

Closing date – October 28, 2024

To apply, please submit a resume (that includes a summary of your relevant experience) and contact information for three references to:
